

Bedroom

Manufactured in Derby, England, our bedroom range is finely crafted using standards honed over 120 years of furniture design. Our bedside commode chairs, transfer boards and furniture raisers help to maintain independence and safety.

Bedroom

Commode Chairs

OVER 120 YEARS OF FURNITURE MAKING

Gordon Ellis & Co. is a family business founded in woodworking since 1893. The traditions and skills built up over the generations continue to be applied in our bedside commodes, with love and care in mind for older people.

For someone who has difficulty getting to the bathroom from their bed, a bedside commode chair could be the answer. Our range was created with our own family in mind, designed to discreetly blend in with the room.

THE ELLIS COMMODE PAN

All our commodes are easy to keep clean and feature the Ellis Lock and Lift Lid. This design locks the lid firmly on to the pail, making it easy to carry. The handle on the back of the pan helps the user to keep a steady grip when emptying it, avoiding inconvenient spills. The pear shaped design makes it suitable for both men and women, while the contoured shape blends into the seat area of all the Gordon Ellis commodes for extra comfort and removes any need for a separate toilet seat.

Basketweave

- Attractive basketweave design
- Concealed commode pan
- High sides offer extra support

A traditional Lloyd Loom wooden framed chair, hand crafted from beech wood, with an attractive white and gold weave. The chair features a hidden self-locking commode pan, concealed completely from view by the comfortable seat cushion.

The high sides of the chair give support for the hand and forearm when rising from the chair; along with discreet privacy for the user.

Available colours

White and Gold weave, with Beech wood

Deluxe

- Solid hardwood frame
- Attractive moquette upholstery
- Ideal for smaller rooms

The compact Deluxe Commode has a strong polished hardwood frame, crafted from solid ash wood. The comfortable padded seat and backrest provide excellent support.

Available in a choice of three moquette fabrics or vinyl upholstery, the Deluxe Commode can be ordered in the perfect colour to match household furniture. Underneath the seat cushion is a removable cassette which allows the entire cassette and commode pan to be cleaned away from the bedroom, or removed permanently to convert this commode into an ordinary chair.

Royale/Royale Extra Wide

- Attractive traditional solid wood design
- Commode pan completely hidden from view
- Solid arms support user when standing

The Royale range of high quality natural ash chairs is designed to blend in to any home setting. The comfortable upholstered seat is hinged and, when pushed back, reveals the hidden commode with the Ellis Lock and Lift lid system. The hinge makes this the easiest commode in our range to remove and replace the seat cushion, as it simply slides out of the way for use.

The sturdy construction and arm rests give support to the user; making it easier to grip and stand up. This solid wood chair is made from sustainably sourced timber using traditional mortise and tenon joints and strong metal-to-metal fixings. The extremely high standard of manufacture means that people will not know it is a commode chair. It is upholstered in fire resistant easy-to-clean fabric. The seat cassette and the commode pan are easy to remove and replace. The chair continues to be an attractive and functional piece of furniture even if the cassette is permanently removed.

Royale Extra Wide Commode

For additional comfort, an extra wide Royale is also available with the width between the arms increased from 18 inches to 21 inches. This is also well suited for bariatric use.

Available assembled or as a flat pack option, which is packaged in a compact box for economical shipping (assembly required).

Royale

Royale Flushing Commode

- Discreet flushing toilet
- Attractive and comfortable
- Hygienic and easy to empty

The innovative design of the Royale Flushing Commode combines the benefits of a stylish and comfortable Royale Commode with the convenience of a hygienic flushing toilet. The commode can be used multiple times before the tank has to be emptied, making life easier for the user or their carer.

Comprising two detachable sections, the upper section is a combined flush water tank and toilet bowl, with a removable toilet seat and lid, while the lower section is a waste tank. The flushing system is activated by a pump handle, which washes the waste down in to the sealed holding tank, where chemicals break it down and destroy unpleasant odour. The holding tank slides out of the commode base to allow quick disposal and easy cleaning.

Ashby Commode

- Available as a chair or stool
- Height adjustable
- Ideal for bedside use

The Ashby Commode can be adjusted to the most suitable height for the user. The chair features a smooth curved backrest and arms, giving support to the user's back. Its compact size and height adjustability makes it ideal for bedside use, while the practical design hides the commode's function. The soft padded cushion, upholstered in washable vinyl, conceals the built-in commode pan from view.

Columbi

- Discreet flushing toilet
- Attractive and comfortable
- Hygienic and easy to empty

Our Columbi Commode features a compact two-in-one design, which can be used both as a commode or an over toilet chair; due to the removable pan. The seat height can also be changed, simply by adjusting the clips on the legs, which is easy to do and requires no tools. The extended armrests by the side of the user provide increased support, making sitting and standing safer and helping to prevent falls. The vinyl seat cushion, plastic seating area and plastic backrest allow the commode to be cleaned quickly and thoroughly.

Derby Corner

- Space saving corner shape
- Best for side transfers
- Large seating area

The unique corner shape of the Derby Corner Commode provides access from the front, or either side. The extra wide access between the arms, combined with a large contoured seating area, helps to make the commode comfortable for any user. Under the seat cushion, the chair features a swivelling commode pan that can be securely positioned to the left, right or centre. This allows the chair to be situated in the corner of a room, or directly alongside a bed.

Devon

- Compact design
- Easy-clean vinyl
- Available as flat pack option

The Devon Commode was developed to be easy to clean, featuring a sealed vinyl cushion and plastic seating area. This gives the best possible hygiene and comfort, in a compact space-saving design. A tough hygienic plastic construction is colour matched to the vinyl upholstery. The sturdy arms and back provide a high level of structural rigidity, making the chair very stable in use while helping to support the user. The back and seat are matched in attractive oatmeal upholstery.

Available assembled or as a flat pack option, which fits in a compact box for economical shipping (assembly required).

Transfer Boards

- Safer transfers from a wheelchair
- Comfortable tapered ends
- Waterproof high gloss finish

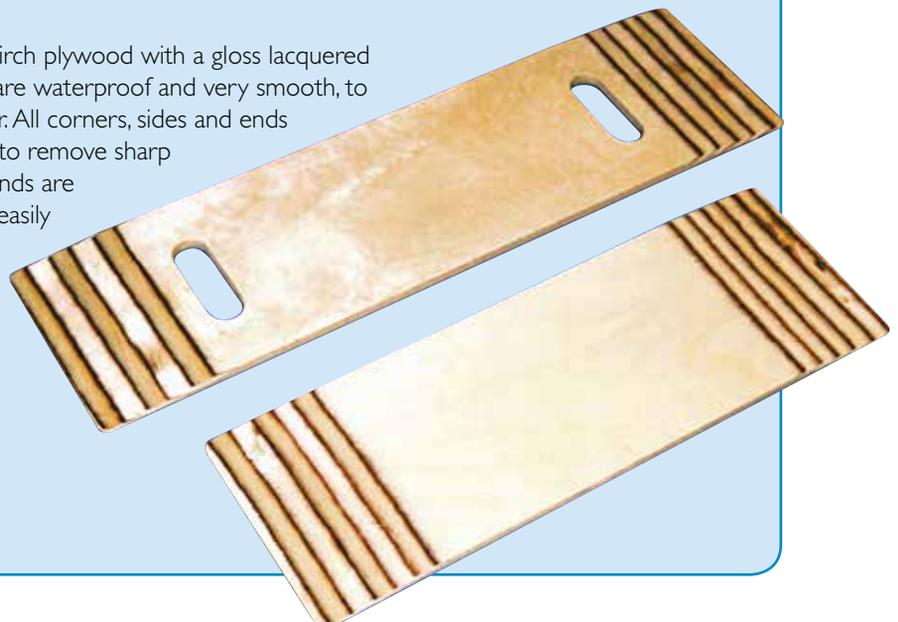

Transfer Boards enable people with limited strength or balance to transfer themselves on to a secure surface from a wheelchair, independently and safely, such as to a car, bed or chair. They offer a greater level of safety when a person is fatigued, alone in the house, or in unfamiliar settings. This helps to prevent falls and removes the need for lifting.

Made from top quality knot-free birch plywood with a gloss lacquered marine finish, our Transfer Boards are waterproof and very smooth, to make sliding along the board easier. All corners, sides and ends are rounded and machine sanded to remove sharp edges and assist the transfer. The ends are tapered so that the user can slide easily over the top.

Dignity Commode

- No installation, just plug in and switch on
- Helps anyone who finds reaching to clean themselves difficult
- Saves carer time and promotes independence

The Dignity Commode is a portable wash and dry bidet commode. It enables people to clean themselves after toileting. It warms the water to an adjustable temperature and has a controlled water spray to clean, with a warm air blower to dry afterwards. Waste is collected for easy disposal.

Easy Installation

It simply plugs into a standard power socket and has a small tank on the side for refilling with cold water. It is an excellent option for people who prefer to clean with water, rather than toilet paper. The unit is quickly and easily moved into the ideal location on its two wheels, which lock away so that it cannot move and will be stable in use.

Easy Cleaning

The hygienic white plastic and plastic coated steel can be quickly cleaned, and the the commode base can be cleaned separately. The base is solid, which means any accidental spills or splashes are contained within the unit.

Developed with the NHS

The Dignity Commode has received praise from the National Institute for Health and Clinical Excellence, who said it "could have a tremendous impact on the quality of care provided for patients who have suffered a stroke or patients with incontinence". The design has been refined and approved by the NHS Devices For Dignity team.

Little Comforts

- The heated seat, water temperature/pressure, frame height and spray arm are all adjustable.
- The remote control has large clear buttons and can be wall mounted.

Available Colours

White with grey commode pan.
